Calf strap

aks hoist slings

All aks hoist slings have been carefully tested and revised so that all slings can be used for standard hoists with reinforced seams up to 250 kg maximum load. Various materials are used: Polyester fabric for use in dry areas; special water-permeable and quick-drying net material for use in wet areas; extremely tear-resistant polyester sling loops; padding made of various foams to avoid pressure peaks or the hoist sling cutting into the skin and to provide additional support for the patient's body and/or increase wearing comfort. Different colour-coded loops facilitate the assignment of the correct mounting position. To stabilise patients, we offer some slings with integrated aluminium strips for back reinforcements; for some other slings, we offer a separate head support with Velcro fastening for patients with little head and neck stability.

Compatibility

Our hoist slings for standard hoists can be used with all aks standard hoists and with a number of hoists from other manufacturers. Please note our declaration of compatibility for hoist slings. This can be found on our website: www.aks.de.

aks head support

The aks head support is available as an option for the following products: Standard sling, bath sling, comfort hygiene sling, horizontal transport sling with 8-point attachment/ ~ for bathing. A Velcro strip makes it possible to fix and position the head support.

Order number – 79712

aks standard sling

The workmanship and material quality of this low cost sling comply with everyday requirements. This can be used by a patient who is still stable in the neck and shoulder area. Picking up the patient from the floor is possible with this sling. Due to colour-coded loops made of extremely tear-resistant polyester, the standard sling is completely adjustable and can be used with all hoist models with hook mounting. The leg supports are produced with additional fabric layers and quilted with padding for reinforcement. This reinforcement also guarantees crease-free seating with high pressure reduction on the thighs. The practical grip loop on the outside supports the carer during manoeuvring of the patient.

Technical Data

Standard: DIN EN ISO 10535:2007-04 Maximum load: 250 kg

Material composition Loop material: 100% polyester sling Outer fabric: 100% polyester Padding (leg supports): 100% PE foam Velcro fastening: 100% polyester

Size S – 88600, size M – 88601, size L – 88602, size XL – 88603, size XXL – 88604, head support with Velcro fastening (optional), as in small picture – 79712

aks standard sling with back reinforcement and integrated head support

As further development, this sling provides a number of advantages: the back and head area are supported and kept straight due to the special back reinforcement, which transitions seamlessly into the head support, and thanks to the removable stiffeners made of aluminium. In addition to the leg and shoulder loops, 4-way adjustable head loops make it possible to individually adapt the sling to the patient. This advantage provides greater security and stability. The net in the buttocks area prevents the patient from sliding out. The special form of the leg supports enables fast and secure positioning of the patient. All of the body is stabilised and supported. This sling is particularly suitable for patients with restrictions of the musculoskeletal system in the upper body.

Technical Data

Standard: DIN EN ISO 10535:2007-04 Maximum load: 250 kg

Material composition Loop material: 100% polyester sling Outer fabric: 100% polyester / 100% polyester net Padding (leg supports): 100% PE foam Padding (back): 100% PE foam Back reinforcement: Aluminium strips

Order numbers

Size S – 88605, size M – 88606, size L – 88607

aks comfort sling with integrated head support

This sling, developed at aks, is for patients with little stability in the torso area and provides comfortable support. The high back part with removable stiffeners made of aluminium and the integrated head support increased safety during use and comfort. The integrated padding of the leg supports also aids the sitting comfort of pressure-sensitive patients. The colour-coded loops enable complete adjustability of the sling and variable positioning. Several grip loops on the outside support the carer during manoeuvring of the patient.

Technical Data

Standard: DIN EN ISO 10535:2007-04 Maximum load: 250 kg

Material composition Loop material: 100% polyester sling Outer fabric: 100% polyester Padding (leg supports): 100% PE foam Back reinforcement: Aluminium strips

Order numbers

Size S – 88610, size M – 88611, size L – 88612, size XL – 88613, size XXL – 88614

aks bath sling

This sling is made of an extremely tear-resistant polyester net that absorbs hardly any water and dries very quickly after use. It has been specially designed for use in baths and wet areas. The leg supports are padded with foam. This reinforcement guarantees crease-free seating with high pressure reduction for the thigh. You can pick up patients who are lying on the floor with this sling. The requirement is participation of the patient who is still stable in the neck and shoulder area. The loops are colour-coded to enable the selection of the correct mounting position. Furthermore, the sling has a **grip loop** on the back for manoeuvring the patient.

Technical Data

Standard: DIN EN ISO 10535:2007-04 Maximum load: 250 kg

Material composition: Loop material: 100% polyester sling Outer fabric: 100% polyester net Padding (leg supports): 100% PE foam Velcro fastening: 100% polyester

Order numbers

Size S – 88615, size M – 88616, size L – 88617, size XL – 88618, size XXL – 88619, head support with Velcro fastening (optional) – 79712

aks bath sling with back reinforcement and integrated head support

The sling is made of a ladder-proof polyester net, which dries very quickly. Its design particularly supports less mobile people when bathing.

See also the description for the aks standard sling with back reinforcement and integrated head support.

Technical Data

Standard: DIN EN ISO 10535:2007-04, Maximum load: 250 kg

Material composition: Loop material: 100% polyester sling Outer fabric: 100% polyester net Padding (leg supports): 100% PE foam Padding (back): 100% PE foam Back reinforcement: Aluminium strips

Order numbers

aks comfort bath sling with integrated head support

This sling has a similar pattern to the comfort sling with integrated head support; however, it has good water permeability due to the net structure of the material and dries quickly. Consequently, it is especially suitable for wet areas.

Technical Data

Standard: DIN EN ISO 10535:2007-04, Maximum load: 250 kg

Material composition: Loop material: 100% polyester sling Outer fabric: 100% polyester net Padding (leg supports): 100% PE foam Back reinforcement: Aluminium strips

Order numbers

Size S - 88625, size M - 88626, size L - 88627, size XL - 88628, size XXL - 88629

aks hygiene sling

Due to the compact design and large cut-out in the buttocks area, it is possible to put on this sling easily and quickly. The patient can then be well-positioned on a toilet as the lower body remains free in the buttocks area. The padding under the arms, leg padding, and grip loops to allow movement along the sling, increase the comfort during transfer of the patient.

Technical Data

Standard: DIN EN ISO 10535:2007-04 Maximum load: 250 kg

Material composition: Loop material: 100% polyester sling Outer fabric: 100% polyester Padding (leg supports): 100% PE foam Padding (armpit): 100% PE foam

Order numbers

Size S – 88630, size M – 88631, size L – 88632, size XL – 88633, size XXL – 88634

aks comfort hygiene sling

As a further development of the aks hygiene sling, this is the most comfortable solution for toileting. The sling supplies maximum support to the back area and sitting comfort due to extra wide padded leg supports. A head support can also be attached.

Technical Data

Standard: DIN EN ISO 10535:2007-04 Maximum load: 250 kg

Material composition: Loop material: 100% polyester sling Outer fabric: 100% polyester Padding (leg supports): 100% PE foam Velcro fastening: 100% polyester

Order numbers

Size S – 88635, size M – 88636, size L – 88637, size XL – 88638, size XXL – 88639, head support with Velcro fastening (optional) – 79712

aks fast transport sling with breast loop

This sling is virtually pre-destined for the fast and uncomplicated transfer of persons with sufficient inherent stability. It has integrated, padded back reinforcement and a breast loop which give the patient a secure feeling. The sling can also be used as a hygiene sling in this configuration. The hoist sling is equipped with grip loops to allow easy manoeuvring of the patient.

Technical Data

Standard: DIN EN ISO 10535:2007-04 Maximum load: 250 kg

Material composition: Loop material: 100% polyester sling Outer fabric: 100% polyester Padding: Back part: 100% polyurethane Armpit padding: 100% PE foam Leg supports/breast loop: 100% PE foam Velcro fastening: 100% polyester

Order numbers

Size S – 88640, size M – 88641, size L – 88642

aks fast transport sling with chest loop for bathing

aks fast transport sling with chest loop for bathing has a similar pattern and the same structure as the aks fast transport sling with chest loop. Due to the water-permeable and fast-drying net structure of the material, it is particularly suitable for wet areas.

Technical Data

Standard: DIN EN ISO 10535:2007-04 Maximum load: 250 kg

Material composition: Loop material: 100% polyester sling Outer fabric: 100% polyester net Padding: Back part: 100% polyurethane Armpit padding: 100% PE foam Leg supports/breast loop: 100% PE foam Velcro fastening: 100% polyester

Order numbers

Size S - 88671, size M - 88672, size L - 88673

aks standaid sling

The standaid sling for aks standard hoists consists of two individual slings with colour-coded 3-way adjustable loops. It is particularly suitable for the fast transfer of patients who have sufficient muscular strength from the shoulder area over the upper body to the thighs. The sling is distinguished by easy and fast use and also aids residual mobility.

Technical Data

Standard: DIN EN ISO 10535:2007-04 Maximum load: 250 kg

Material composition: Loop material: 100% polyester sling Outer fabric, inside: 100% polyester with 100% PU coating Outside: 100% polyester Padding: 100% PE foam

Order number

Size M – 88665

aks universal comfort sling

The universal comfort sling is made of flexible fabric materials that adjust to the patient's body. The different colour-coded sling loops are made of extremely tear-resistant straps and are mounted on a suitable spreader bar. This sling is intended for use in dry areas and is suitable for supporting amputees. A grip loop is attached in the head/shoulder area for manoeuvring.

Technical Data

Standard: DIN EN ISO 10535:2007-04 Maximum load: 250 kg

Material composition: Loop material: 100% polyester sling Outer fabric: 100% polyester

Order numbers

Size M – 88656, size L – 88657, size XL – 88658, size XXL – 88659

aks universal net sling/ aks universal Flex sling

The universal net sling offers great flexibility: the shoulder loops are 3-way adjustable for reaching the optimum position, while the leg loops are even 4-way adjustable. Optional sitting comfort when using the aks tandem spreader bar (see picture). Three handles are used for the required positioning of the patient. The single-ply net material has good water permeability and dries quickly. It is ideal for use in wet areas (bathing). This sling is also highly suitable for amputees.

The universal Flex sling is similar to the universal net sling. In this regard, the grip loops have been deliberately omitted so that the sling can remain underneath the patient for a certain amount of time (e.g. in a wheelchair, seat shell). This means there is no need to remove the sling directly after the transfer.

Technical Data

Grip loops

Standard: DIN EN ISO 10535:2007-04 Maximum load: 250 kg

Material composition: Loop material: 100% polyester sling Outer fabric: 100% polyester net

aks wall charging stations and spare rechargeable batteries

Independence in daily care, particularly in hospitals, homes for the elderly and nursing homes

Advantages:

- Independence from the mains supply; a charged battery is always on hand
- Effortless replacement of the battery pack
- Easy wall mounting close to a power outlet
- Visual charge status shown by LEDs

Technical Data (pictures 1 and 2)

- Wall charging station: Charge time: approx. 3-14 hours/ overload protection; input: AC 230 V/50 Hz; output: DC 24 V/I_{max} = 4 A
- Battery pack: operating voltage 2 x 12 V; capacity 4.5 Ah (Technical data for foldo[®], aks XL hoist torneo[®]; see respective instructions for use)

aks hoist scales

Weighing patients is part of the everyday nursing routine. The use of scales directly connected to the aid or hoist is particularly practical. aks provides two weighing devices in connection with the various aks standard hoists.

aks dw 150 Ideal aid for checking weight

- Easy handling: function on/off, tare button, hold
- Flexible use: can be used with adapter for all aks hoists (for the foldo[®], the scales cannot be used in the swivelled condition)
- Display elements can be read off in 500 g increments: "E" if the weighing range is exceeded, "LO" if battery is empty
- Power-saving function: automatic switch-off after approx. 4 minutes
- Max. weighing range: 150 kg
- Cost-effective standard solution for the everyday nursing routine

Order number

incl. adapter for aks hoists - 89016

aks efw 200/300

The practical weighing device for the everyday nursing routine – also for heavy cases

- With battery-operated high-precision scales for aks standard hoists with special adapter
- For "determination of mass in the exercise of medical science, when weighing patients for medical monitoring, examination and treatment reasons", as specified in EU Directive 2009/23/EC in class III of non-self-activating scales
- aks efw 200 can be used up to max. 200 kg patient weight and aks efw 300 up to max. 300 kg patient weight
- In accordance with Directive 93/42/EEC for attachment on aks patient hoists:

up to 130 kg body weight: foldy® micro and foldo®, up to 150 kg body weight: foldy®, foldy® e, clino® II, dualo® standard, foldy® mini, dualo® mini standard, up to 185 kg body weight: foldy® XL, foldy®e XL, clino® XL, clino®e XL and up to 250 kg body weight: goliath®

- Initial gauging: calibrated and tested at the factory
- Simple handling with clear display and indication of the functions: on/off, tare, gross/net weight; reading precision in 100 g increments
- Power-saving function: automatic switch-off after approx. three minutes
- BMI function

aks carry

Your assistant for the operating load test in accordance with DIN EN ISO 10535 Appendix B

The aks carry is designed to hold, store and transport weight plates (picture 5). The load support holds the weight plates and is mounted either with the snap hook or directly on the lifting arm. The standard hoist is then ready for the operating load test in accordance with DIN EN ISO 10535 with a lifting cycle at maximum load.

The advantages of the aks carry:

- Max. load capacity 250 kg
- Support and handle made of steel, powder-coated
- Four castors (Ø 100 mm), can be locked individually
- Load support made of stainless steel for holding the weight plates
- Snap hook with screw lock in accordance with DIN EN 362
- Handle (picture 4), can be removed without tools, secured with a tube clip
- Aqua blue

Scope of delivery

- Support with castors and handle, load support, two snap hooks (picture 2)
- Delivery without weight plates
