The functional strength for the available bed at home

aks-B4 L

aks-B4 XL

aks-B4 XXL

In the usual environment – at home, in your bed – the benefits of a care bed can also be used for heavyweight persons without great expense. The lifting care bed frame is installed in the existing bed and is immediately functional, with all the advantages of a care bed.

The advantages of the lifting care bed frame:

- Increased lying comfort due to four-section lying areas, electrically adjustable height and head part
- Maximum functionality: foot part with knee bend of the lifting care bed frame is electrically adjustable by hand control without nursing assistance – patient-protected!
- Stable construction with powerful single scissor (aks B4 L and B4 XL) and metal lying area
- High stability for the problem of care of heavy patients due to robust metal lying area and our in-house developed double scissor (aks B4 XXL)
- Simply install in the existing bed at home or in the nursing home
- Mains power cut-off: This safety system electrically disconnects all poles of the lifting care bed frame from the mains power supply when the hand control is not in use.
- Hand control with large buttons, lock function and check of the first failure safety is possible
- Special colour RAL 7035 – light grey

Options and accessories

- Strengthened uplifter made of square tube from 120 cm lying area width, with grab handle
- Side rail and hightened side rail with special holder

See table on p. 121

Scan to see how the knee bend works.
