

foldo®

Lifting – Swivelling – Bathing

In addition to the standard functions – lifting, transferring and moving of a person – foldo® can also be used in the bath area thanks to the electronically protected swivel function. It completely fulfils the expectations of users: universal, convenient use in the bath and living area without structural changes at home or in homes for the elderly or nursing homes.

The advantages of the aks foldo®:

- “Two-in-one concept” – standard hoist and bathtub hoist in one
- Exercise of the functions of a standard hoist, in addition, effortless take-up of persons directly from the floor
- Lateral swivelling for use at the tub (see above)
- Easy and fast “docking” of the hoist without structural changes
- Lowering of the patient to the bathtub
- Cost-effectiveness principle: saves separate bathtub hoist, wall hoist, or ceiling hoist
- Low ground clearance, also suitable for aks scissor beds
- Mechanical spreading of the chassis per foot lever
- Safety in the bath thanks to stable support on the edge of the tub due to tub cover and telescopic boom, as well as safety electronics for swivelling the patient above the tub using electric motor
- High stability thanks to two lockable castors (diameter 100 mm) and robust construction
- Functional wall bumpers for protection during manoeuvring
- Max. load capacity 130 kg

Options and accessories

- Various hoist slings, spreader bars and hoist scales as well as tub covers and tub cover elevation elements

See the transfer from wheelchair to bathtub with foldo and aks bath sling.
