

aks SB L, SB XL, SB XXL

The right bed for every stature

aks-SB L

aks developed the bed series SB L to XXL for heavy and large patients. The SB L type is intended for persons up to 150 kg body weight who cannot be supplied with standard beds due to their anatomy.

The SB XL can be used for patients up to a body weight of 200 kg and has higher mirror panels and three side rails. SB XXL rounds off the bariatric range. With the particularly stable double scissor, the heavy duty bed easily accomplishes handling a patient weight up to 300 kg.

aks-SB XL

Advantages of the care beds from SB L to SB XXL:

- Increased lying comfort due to four-section lying areas, electrically adjustable height and head part
- Maximum functionality and safety: Foot part with knee bend is electrically adjustable from the bed by hand control without nursing assistance
- Protection against falling out: wood side rails integrated on both sides, SB XL and XXL with three rails and particularly high head and foot parts
- Stable construction with powerful single scissor (aks SB L and XL) and 125 mm castor diameter
- High stability for the problem of the care of heavy patients due to in-house developed double scissor with 8 castors, 100 mm diameter for aks SB XXL
- Many different versions in size and max. patient weight
- Mains power cut-off: This safety system electrically disconnects all poles of the bed from the mains power supply when the hand control is not in use
- Hand control with large buttons, lock function
- Including uplifter, from 120 cm lying area width: Square-tube version, and grab handle
- Special colour RAL 7035 – light grey

aks-SB XXL

Options and accessories

- Hightened side rail
- Standing aid
