

torneo® compact

The compact and manoeuvrable stand-up hoist

The mobile torino® compact stand-up hoist has been designed to be compact and manoeuvrable. The natural motion sequence of standing up and sitting down is supported and is carried out gently. The patient's mobility is promoted by their active participation.

Characteristics and advantages of the torino® compact

- Max. load capacity up to 150 kg
- Compact dimensions
- Use in small rooms and with narrow doors
- Extremely manoeuvrable in the smallest areas
- Stand mast and lifting arm can be adjusted in two stages
- Shin support height can be continuously adjusted with integrated calf strap for more security
- The movable shin support adapts to the movement of the legs during the lifting procedure.
- Electric motor-powered uprighting function
- 24 V system with a removable battery pack
- Controller with state of charge and service indicator
- Acoustic warning signal to protect against deep discharge of the batteries in the event of actuation of the manual control unit.
- Highly stable thanks to six castors
